* Note that all responses to this action should be sent to Art Unit 1711.

35 USC 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 6219329; or EP 0438225 or USP 6183830 or USP 4891800 see abstract, claims.

Each of the references discloses a data storage media prepared from the same components as claimed by applicants except for the particular amounts and parameters, i.e. trasmissivity as claimed. Note applicant(s) "comprising" is open language and does not exclude those additional moieties etc. disclosed herein.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ particular parameters as known in the art, since it is well-established that merely selecting ranges is not patentable absent a showing of criticality. In re Becket, 33 U.S.P.Q. 33 (C.C.P.A. 1937). In re Russell, 439 F.2d 1228, 169 U.S.P.Q. 426 (C.C.P.A. 1971).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

Art Unit: 1711

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-33 are rejected under 35 U.S.C. 102(a, b, or e) as being anticipated by over USP 6219329; or EP 0438225 or USP 6183830 or USP 4891800 see abstract, claims.

Each of the references discloses a data storage media prepared from the same components as claimed by applicants .

Note applicant(s) "comprising" is open language and does not exclude those additional moieties etc. disclosed herein. Any properties or characteristics inherent in the prior art, e.g. transmissivity, although unobserved or detected by the reference, would still anticipate the claimed invention. Note In re Swinehart, 169 USPQ 226. "It is elementary that the mere recitation of a newly discovered...property, inherently possessed by things in the prior art, does not cause claim drawn to those things to distinguish over the prior art". Since the disclosed parameters are expressed differently and thus may be distinct from those claimed, it is incumbent upon applicant(s) to establish that they are in fact different and whether such difference is unobvious. In view of the above, there appears to be no significant difference between the reference(s) and that which is claimed by applicant(s). Any differences not specifically mentioned appear to be conventional. Consequently, the claimed invention cannot be deemed as novel and accordingly is unpatentable.

Correspondence

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Terressa Boykin, via the receptionist whose telephone number is (703) 308-2351. The examiner can normally be reached on Monday through Friday from 8:00a.m.-2:00p.m.

However, any inquiry of **MISSING PAPERS should be directed to 703 305-7874** or if of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703)308-2351.
